Post Event Report

Summary about ETGovernment Transforming Odisha Conclave

Odisha's Chief Minister Naveen Patnaik has transformed Odisha by erecting and ensuring a people-centric governance model. Governance in the state has been characterized by a 5T framework: technology and leveraging it, transparency in governance, teamwork from the various stakeholders involved, and meeting targets in a time-bound manner, thereby leading to transformation.

ETGovernment.com in association with the Department of Electronics & IT, Government of Odisha is organizing a one-day virtual conclave 'Transforming Odisha 2022' on 22 April 2022. The conclave will provide a platform to senior government officials, technology leaders, and a galaxy of luminaries from academia to discuss the paradigm shift in governance, adoption of digital technologies in the new normal and changing landscape and ecosystem of IT and ITeS industries as well as electronics manufacturing in the state of Odisha.

Asit Tripathy

Our agriculture has consistently registered more than the national average growth rate and today we are one of the biggest producers of paddy in the country. Our state is also very rich in natural resources including fisheries and animal husbandry wherein also we are making big progress.

C J Venugopal

Digitisation of the land records has been one of the biggest achievements of our state. Today we have more than five crore land records being mapped over the last 30 years. It has made the lives of citizens simpler, refining the database and enabling all schemes of the government.

Ranjana Chopra

We have been able to ensure that there is a single digital platform that multiple stakeholders are able to access and gain benefits, be it students, industrialists or micro entrepreneurs. The framework that we are working on is the 5T framework in which technology plays a very important role.

Hemant Sharma

In the last three years, Odisha has been able to attract investments of more than Rs four lakh crore, which is the highest in the country amongst all the states in the country. In the FY 2020-21, Odisha surpassed even Maharashtra in attracting investments and we were at the forefront of attracting investments across diverse sectors.

Fireside Chat: Decoding Odisha's model for sports development

Along with the corporate and the government providing the support role, we are trying to push the activities through the sports federations both at the state and national level. The major stakeholders are the coaches, players and sports science related staff. We are trying to bring all of them together to create an ecosystem and provide the level-playing urban infrastructure.

Rethinking Cyber Security Strategy for Governments

Manoj Kumar Pattnaik
Additional Secretary, E&IT & CEO, OCAC, Government of Odisha

Manas Panda
Director, Software Technology Parks of India (STPI) Bhubaneswar

Sohan Nautiyal
Head, State e-Governance Mission Teams (SeMT), Odisha

Snigdha Acharya
Senior Technical Director & Head, Centre of Excellence for Application Security (CoE-AppSec), National Informatics Centre, Bhubaneshwar

Parikshit Gangaher
Manager Systems Engineering, Fortinet

Mohd Ujaley
Senior Assistant Editor, Government
Moderator

Manoj Kumar Pattnaik

There have been mainly two reasons for the dramatic increase in the number of victims of cyber-attack during the pandemic. First, more and more common people join the online network to access services because and second, work from work is the new norm making employees vulnerable to attack due to less or no security on the internet.

Manas Panda

Industry of all sizes faced a lot of challenges during the pandemic both from business continuity and cybersecurity perspective because they were not prepared for this kind of vulnerable access attacks but gradually things improved.

Sohan Nautiyal

As part of cybersecurity preparedness, we have established state of the art Security Operations Centre to secure government websites and web. We also have a Network Operation Centre and now we are trying to use next-generation technologies such as AI and Machine Learning to bolster our cybersecurity posture.

Snigdha Acharya

During the pandemic, the threat landscape evolved to a different level than was originally seen earlier as people shifted to work from home, mostly relying on VPN networks so they became the huge target of cyberattacks.

Parikshit Gangaher

Integrated digital platforms have become a reality for government organisations. Now they need to categorise security in a different architecture. It is no longer only about network security or any other silos security. Now they have to have a zero-trust environment.

Prof. S. K. Mishra
Advisor, Telemedicine Programme, SGPGI, Lucknow & Distinguished Visiting Professor, Indian Institute of Technology, Kanpur

Mohd Ujaley
Senior Assistant Editor, Government
Moderator

Yamini Sarangi

The key lesson we learned was that one needs to adopt aggressive as well as very innovative methods of procurement during the pandemic including offering incentives to suppliers, which is not a regular methodology in government procurements.

Reghu G

Many people think innovation is happening only in higher level institutions but during the pandemic a lot of innovation happened at the ITIs level. Those may not be big bang innovations but helped in mitigating simple challenges during the pandemic like need for patient support, scarcity of sanitizer or mask.

Manoj Kumar Pattnaik

In a post pandemic world, we need to make hybrid learning an integral part of our education system. Also, we need to reduce the gap in digital access including connectivity, access to devices and equipment.

Kedarnath Bhagat

I am proud to tell you that work in the telemedicine space in Odisha started way before other states. We did face some challenges initially on the acceptability part but those have been allayed pilot after pilot and the lessons learnt from pandemic also suggest this is the way to go for improving access to healthcare.

Prof. S. K. Mishra

Telemedicine played a very important role during the pandemic in continuity of medical services across the country but this has to be streamlined in an organic way. Both the government and MCI need to create a conducive ecosystem for telemedicine in the country.

Paradigm shift in governance; Adoption of digital technologies in the new normal

Arun Bothra	Md. Sadique Alam	Trilochan Panda	Sanjaya Kumar Mishra	Dr Manoranjan Puthal	Sohan Nautiyal	Kartik Sharma
Transport Commissioner cum Chairman, State Transport Authority, Government of Odisha	Director of Industries, Government of Odisha and Chief Executive Officer, Startup Odisha	MD, Grid Corporation of Odisha (GRIDCO)	MD, Odisha Power Transmission Corporation Limited (OPTCL)	Managing Director, Odisha Knowledge Corporation Ltd. (OKCL)	Head, State e-Governance Mission Teams (SeMT), Odisha	Senior Associate Editor, Government **Moderator**

Arun Bothra

Odisha Transport department is one of the most advanced departments in the country as fas the usage of technology is concerned. Today we have a totally faceless registration system. Most kinds of services are given online.

Md. Sadique Alam

The state of Odisha has brought the first legislation in the country for the single window clearance system which enables investors to approach a single designated authority and get all clearances and approvals in a time-bound framework.

Trilochan Panda

In the power sector, a lot of game-changing disruptions should be happening. Decarbonization and decentralization of power, digitization, real-time interactions with consumers, transparency, reliable and secure electric power systems are some disruptions.

Sanjaya Kumar Mishra

We take electricity services to the doorsteps of the people. Odisha's availability of electricity to the common consumer is higher than the national average.

Dr. Manoranjan Puthal

OKCL's job is to convert knowledge into wealth for society. We insist the youth use their knowledge and generate wealth for the society and themselves.

Sohan Nautiyal

The government has reiterated that the people of the state will have the freedom not to visit the government offices, they will have the options of online services at their doorsteps through the professionally run Mo Seva Kendras.

Sanjeev Chopra

Odisha is one of the pioneer states that has been using technology in agriculture for the benefit of farmers. We have a verified database of about 50 lakh farmers and we are very soon going to launch a portal called Krushak Odisha in May 2022. This portal will have several benefits and it will become a single point of contact between the farmers and state government in the near future.

Vishal Kumar Dev

Industries and Services sectors have witnessed phenomenal growth in Odisha and have also contributed the most in economic recovery post pandemic. Agriculture contributes about 20% of the economy and industry and services contribute about 40% to the economy. Industries sectors saw growth of 14.5% over the previous year.

Susanta Kumar Purohit

Digital Door & Street Numbering is another flagship programme of the state government to create a uniform address system for all urban dwellings using geospatial technology. Through this system, each house will be given a unique 14 digit number alphanumeric code and this will help easy navigation of the domestic residences. It will also lead to improved public service delivery and response time. Another advantage of the system is that all the services fees like water tax, electricity charges, trade taxes etc. can be now linked to a single digital number thereby benefiting the citizens with a hassle-free payment system of various services.

Bhupendra Singh Poonia

We are looking at different aspects of adopting digital methods. We are adopting technology to improve our efficiency, work culture, and in our interactions with the citizens, investors, entrepreneurs through our own onlise system.

Pradipta Kumar Swain

For sustainable water management, WATCO has undertaken digital means to provide regular water supply under the drink from tap mission. This mission's aims towards conservation of water.

Sanjay Kumar Srivastava

Skilling youth and enhancing livelihood is our motto. We are training the youth to leverage digital technologies with several courses including Computer aided design, engineering, manufacturing, robotics etc.

- **Special Address on ‘Taking a giant leap in digital governance and delivering citizen-centric services to the last mile’**

- In the last two decades, the state government has been using several technologies to transform the local self government in Odisha by introducing computers. We have laid out our own network called Odisha State Wide Network (OSWAN) to provide connectivity to all gram panchayats and blocks in the state.

- **Special Address: Innovation in MCL in the Age of Digital Technology**

- MCL is one of the first subsidiaries of CIL to have introduced and implemented ERP and SAP based systems, wherein all operations and services have come on to the digital platform, resulting in rigorous monitoring of the crucial activities and sharing of essential data amongst all concerned HoDs.

Kabita Roy Das
Deputy Director General & SIO, National Informatics Centre (NIC) State Centre, Odisha

Kabita Roy Das

Debidutta Biswal

Digital initiatives of NIC in Odisha:

NIC Odisha vaters its services from rural development, urban development, energy, excise, agriculture, education revenue, industry, health, finance and almost all the sectors or departments.

The transformation in the mining sector in Odisha began with I3M - Integrating Mines Mineral Management System, started implementing in 2011 on a pilot basis. We rolled it for the entire state in 2012-13. It helps track minerals end-to-end from dispatch to the mining lease and end point.

Vir Vikram Yadav

Transformation in the Food, Supplies and Consumer Welfare Department has been driven by the 5T matra of governance of Odisha state. We have taken reforms in two important schemes being run by the department - paddy procurement operations and distribution of food grains to the beneficiaries under the National Food Security Act and State Food Security schemes.

Manoj Kumar Pattnaik

In a post pandemic world, we need to make hybrid learning an integral part of our education system. Also, we need to reduce the gap in digital access including connectivity, access to devices and equipment.

- The Science & Technology Department is establishing a Biotechnology Incubation Centre at Institute of Life Sciences (ILS) in Bhubaneswar for promotion of the Biotechnology sector in the State. We have decided to establish 500 Regional Innovation Science Hubs for ideation in various schools including Scheduled Tribe schools in a phased manner. It is proposed to set up 50 such units in the year 2022-23.
